

```

// C program to print
// message as colored characters
#include<stdio.h>
#include<graphics.h>
#include<dos.h>

// function for printing
// message as colored character
void printMsg()
{
    // auto detection
    int gdriver = DETECT, gmode, i;

    // initialize graphics mode
    initgraph(&gdriver, &gmode, "C:\\\\Turboc3\\\\BGI");

    for (i=3; i<7; i++)
    {
        // setcolor of cursor
        setcolor(i);

        // set text style as
        // settextstyle(font, orientation, size)
        settextstyle(i, 0, i);

        // print text at coordinate x,y;
        outtextxy(100, 20*i, "Geeks");

        delay(500);
    }
    delay(2000);
}

// driver program
int main()
{
    printMsg();
    return 0;
}

```
